This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION.

CARLYLE, the celebrated historian and essayist, once wrote: "Some nations have prophecy, some have not; but of all mankind, there is no tribe so rude that it has not attempted History, though several have not enough arithmetic to count five . . . . the Celt and the Copt, the Red man as well as the White, lives between two eternities, and *warring against oblivion*, he would fain unite himself in clear, conscious relation . . . . with the whole Future and the whole Past."

It is to this spirit of "warring against oblivion" that we owe the daguerrotype, the painting and the portrait from which the faces of the past look out upon us. But it is only by means of modern inventions that a man may have collected for himself, between the two covers of a single volume, the faces of a thousand friends. In a word, the invention of the camera and the half-tone engraving alone makes possible such a volume as this. These scientific processes enable a man to war against oblivion and preserve his own features for present and future generations. They also enable him to preserve the features of the friends and compeers who are of most interest to him during the "strenuous" period of his life. They enable him to baulk oblivion.

Many books of biography have been issued even in young Canada. The most important of these are Morgan's two volumes (1862 and 1899), Fennings Taylor's "Portraits of British Americans" (Notman), and Dent's four volume "Portrait Gallery," with its full-page plates. Morgan's books are not illustrated. Taylor's three volumes were illustrated with original photos, but contained less than one hundred

portraits. Dent's illustrations were crude attempts at photography, and decidedly unsatisfactory. It has remained for the publishers of this volume to lead the way with a volume containing portraits absolutely faithful in every detail, and including leading men from every walk of life. For this reason, this book must ever be memorable in the historical annals of the Dominion of Canada, and the Editor may be pardoned for his pride in being connected with such an undertaking.

This volume differs from all its predecessors in that it is a story almost without words. The face of each man is left to tell its own tale — the story of struggle and achievement and triumph, the glorious battle of "something accomplished, something done." The facts, either written in the face or in the few simple words below, are left to speak for themselves, for he would be bold indeed who would dare to estimate and distinguish the worth of each of those whose faces look out from these pages.

The portraits contained in the volume have been selected with the greatest care. They represent every profession and every line of industry, and include only the leaders in each. They represent every town and city in the Dominion, and thus the volume is easily distinguished by breadth and comprehensiveness from the scores of trivial volumes representing single communities. The portraits included are those of successful and influential men, the citizens to whom the country is indebted for its stability and progress.

It is but thirty-four years since the Dominion of Canada was founded, and the man who would then have predicted its present wealth, population and importance would have been laughed to scorn. But, in spite of numerous difficulties, progress has been steadily manifest. The forests have been transformed into smiling agricultural districts. Towns and cities have grown up to represent

the industrial and commercial interests which are a necessary complement to agriculture and dairying. Canals have connected the great lakes, and flat-bottomed batteaux have been replaced by the modern passenger steamer and the huge whale-back. Railroads have been built, and have covered the country as with a fish-net. The telegraph, the telephone and electric power have added to the speed of commerce. Because this commerce is important and because it be heterogeneous and complex, the men who guide it are worthy of being rescued from "Oblivion." The credit is not all due to the pioneers who have passed away; the battle is still on, and the officers of the army of to-day are worthy of recognition. History is being made now just as much as it was one hundred years ago, though our nearness prevents our seeing a great deal of it. For this reason there is no excuse required for this work. Future generations will require it as a work of reference; the historian will draw inspiration and information; while the sons will look upon the faces of the fathers whose deeds are remembered with pride.

The title, "MEN OF CANADA," has been used in its very broadest sense, to include the whole of Canada—the premier Colony of Great Britain. It has been interpreted to mean men who—wherever born or brought up, or wherever their home or place of business — represent interests or connections within its borders that give them both vital interest and pride in the welfare of the Dominion.

In course of time these books will prove of interest to the then existing generations, looking backward to study the people of this time as typified in

"MEN OF CANADA, 1901-1902,"

and no doubt here will be found some of whom Fitz-Greene Halleck wrote,

"——the immortal names,
That were not born to die."
